See related research by Chen et al., <http://ccforum.com/content/18/1/R8>

After publication of our article in a recent issue of *Critical Care* [1], inconsistencies were identified in Figure 6. Four trials - by Fuentes-Orozco and colleagues [2,3], Hall and colleagues [4], and Goeters and colleagues [5] - were allocated to

the wrong subgroup in our meta-analysis. They should have been included in the first subgroup (glutamine <0.3 g/kg per day); this does not change the significance of the results ($P = 0.01$). The correct Figure 6 is given here in full as Figure 1.
